

The simulator is being used to create videos for a legibility study.

The scene being used is in Assets > BarProps > Scenes > Demo2

The path from the Start Waypoint to the end waypoint (either Correct Table Waypoint or Incorrect Table Waypoint) is determined by a CSV file in the Assets > Scripts folder. These hard-coded waypoints are below.

Start Waypoint: (5.796, -0.2, 1.979)

Correct Table Waypoint: (4.13, -0.2, -5.25)

Incorrect Table Waypoint: (4.13, -0.2, -7.8)

Viewpoint 1: (3.651, 0.837, -5.845)

Viewpoint 2: (2.866, 0.837, -5.158)

Viewpoint 1 Rotation: (0, 6.646, 0)

Viewpoint 2 Rotation: (0, 58.582, 0)
